Forecast For Northeast England
Issued by Met Office Exeter
at 1600 on Sunday 28 Feb 2021

++ Valid for broadcast between 1800 and 0600

Headline:
A chilly night, with frost and fog patches forming.

This Evening and Tonight:
Plenty of clear spells this evening, but soon becoming chilly with frost and fog or freezing fog patches forming inland overnight. Low cloud and sea fog is likely to drift in off the North Sea affecting coastal parts towards dawn. Minimum temperature -2 deg C (28 deg F).

Monday:
Some bright spells possible in northern and western parts, otherwise low cloud and sea fog will continue to affect coasts. Becoming cool overnight with low cloud spreading across all parts. Maximum temperature 9 deg C (48 deg F).

Outlook for Tuesday to Thursday:
Mostly cloudy on Tuesday and Wednesday, with early fog lifting into low cloud. Thursday will be mostly cloudy with some drizzle at times. Turning drier and colder later on Thursday.
